About Us

With over 20 years of experience in the industry, our team at Smith Welding is made up of skilled welders and fabricators who are passionate about what they do. We are dedicated to providing our clients with personalized service, high-quality workmanship, and attention to detail.

Types of Welding Services

MIG Welding

Metal Inert Gas welding is a versatile and efficient process used for mild steel, aluminum, and stainless steel. Our team can handle projects of any size and complexity.

TIG Welding

Tungsten Inert Gas welding is a precise welding method that produces the highest quality welds on a variety of metals. It's ideal for complex shapes and thin materials.

Stick Welding

Stick welding is a simple and reliable method used for welding heavy-duty materials and structures. We have the equipment and expertise to handle even the toughest welding jobs.

Steel Fabrication

Custom Metal Fabrication

We specialize in creating custom metal fabrication pieces from drawings and spec sheets. Our experienced team works with our clients every step of the way to ensure the final product meets their needs and exceeds their expectations.

Structural Steel Fabrication

Our team has experience designing and building unique structures for various commercial and residential projects. From beams and columns to platforms and decks, we provide quality fabrication services that are built to last.

Metal Artwork

We create one-of-a-kind metal artwork and sculptures. Whether it's a custom metal sign or a unique sculpture, our team can bring your vision to life with creative designs and expert welding techniques.

Welding Techniques

MIG Welding

Metal Inert Gas welding is a versatile and efficient process used for mild steel, aluminum, and stainless steel. Our team can handle projects of any size and complexity.

TIG Welding

Tungsten Inert Gas welding is a precise welding method that produces the highest quality welds on a variety of metals. It's ideal for complex shapes and thin materials.

Stick Welding

Stick welding is a simple and reliable method used for welding heavy-duty materials and structures. We have the equipment and expertise to handle even the toughest welding jobs.

Certifications and Experience

① Certifications

Our team is certified in a variety of welding disciplines, including MIG, TIG, and Stick welding, to ensure that we can handle any job that comes our way.

② Experience

We have over 20 years of experience in the welding and fabrication industry, and we have completed everything from small projects to large, complex structures.

Portfolio

Commercial Bridges

We've worked on a variety of commercial bridge projects, including pedestrian bridges, highway overpasses, and more.

Metal Artwork

We specialize in creating unique metal artwork and sculptures, including custom metal signs and large-scale sculptures.

Stairs and Railings

From commercial staircases to custom residential railings, we can design, build, and install high-quality steel fabrications to enhance any space.

Contact Us

Get in touch with us today to discuss your welding and fabrication needs. Our team is dedicated to providing exceptional service and high-quality workmanship. Whether you have a small project or a large-scale commercial build, we have the expertise to get the job done right.
